Dear Michael:

It has been nearly a year since your generous donation of the light and sound units to Our House and both units proved to be extremely beneficial to the residents, especially Dr. Rayma Ditson-Sommers cassette, "Comfort Through Calmness". Residents of the program here at Our House have described achieving a state of relaxation that they have not experience for quite a long time. As you realize, with our six month residential HIV/Chemical Dependency program, overcoming stress and learning to relax is the primary step towards positive personal development. I believe these units be a tremendous help to the residents when they graduate the program as well and hope they will continue to use the units after they graduate.

On behalf of the residents and staff of Our House your companies support has been greatly appreciated. Together, we can continue to achieve our goal here at Our House by assisting our residents in leading a positive, fulfilling and drug-free lifestyle.

Sincerely,

Gerramy Quarto
Treatment Coordinator
