RE: 515 Binaural Frequency Gen.

Dear Michael:

Thank you for introducing us to the **515 Binaural Beat Frequency Generator**. I have found it to be a most useful tool in promoting relaxation in my clients. As a clinician and therapist I am always looking for methods to make my clients feel at ease so that we may get beyond dealing with symptoms and move to causative root incidents. I find that the 515 is a quick painless way whether using it in the waiting room, group sessions or in private individual sessions that this is an effective background substitute for the typical muzak approach. Not only do I find this helpful for the clients but, the staff enjoys it too.

As you know the **Phoenix Path Program** is a drug treatment alternative to the traditional twelve step approach. Based on the mind body connection and bio-feedin, bio-feedback paradigm, our responsibility grounded, self pay program provides our clients with over a hundred different tools and techniques to deal with the stressors that continue to drive their substance abuse. However, before we can teach these new neuro associations and interrupt the old patterns we must have a relaxed client for true learning to occur. In my opinion the 515 is a valuable aid toward relaxing our clients to help change their perspective therefore, their self perception and thereby, their behaviors. We teach our clients how to make this transition to not be powerless over drugs or alcohol. We are responsible for our behavior. **SHIFT HAPPENS** because we make it happen.

Thanks again Michael for the Photosonix 515.

Professionally yours,

Rob Runyon, R.H.A.
Director
